

SECRET

20 July 1967

MEMORANDUM FOR: Chief, Operations Branch, HRG/CGS

ATTENTION : [REDACTED]
THROUGH : Chief, Planning Staff, OSR
THROUGH : Chief, Theater Forces Division, OSR
SUBJECT : Revisions of Current Intelligence Reporting
List (CIRL) for the USSR, 15 August -
14 December 1967

Military-Affairs - Guided Missiles

E. Air-to-Surface Missiles (ASM)

1. The AS-2 (Kipper) is operational on the Tu-16 (Badger C), the AS-3 (Kangaroo) is operational on the Tu-95 (Bear) and the AS-4 (Kitchen) is believed to be entering operational service on the Blinder B. Nineteen Blinder with AS-4 missiles were shown at the Moscow Air Show in July 1967. Information on the characteristics of these missiles is required. (S)

2. Other information required [REDACTED] and information concerning deployment of the missiles and their carrier aircraft. (S)

F. Repeat introductory paragraph.

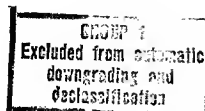

1. Information on characteristics [REDACTED] are needed on all air-to-air missiles. The number of missiles, the type missiles, and the specific carrier aircraft are all of value. (S)

2. Information concerning air-to-air training and tactical employment is needed. (S)

C. Military Affairs - Air

Replace paragraph 7 with the following. Report on the capabilities, doctrine, and tactics of Soviet Military Transport

SECRET

SECRET

Aviation Units, particularly those serving the airborne forces. Report the deployment of the An-22 to these units, as well as any information concerning continued production of the An-12 and its deployment. Delete paragraphs 8 through 10. (S)

D. Aircraft Production, Deployment and Facilities

Five new fighter aircraft were shown at the July 1967 Moscow Air Show. They were a twin-jet Mikoyan fighter, a single-jet Mikoyan fighter, a variable wing Mikoyan fighter, a twin-jet Sukhoy fighter and a Fitter with variable wing. In addition to these new aircraft a number of Blinder B with ASM's were shown as was a new light turboprop transport, the Beriyev-30. (S)

1. Information on production, deployment, [REDACTED] on any of these new aircraft is needed. (S)

25X1B

2. Information on the production of Fitter (Su-7) fighter-bomber and Brewer (Yak-28) jet light bomber [REDACTED] is needed. (S)

25X1B

3. Information on the production and deployment of Blinder B is of particular interest. (S)

4. Various reports indicate that a large new Mil' helicopter will be built. This helicopter is expected to be larger than the Hook (Mi-6). Obtain photographs of this new large helicopter. What is its production status? Where will it be produced and when will it enter production? (S)

5. The USSR is developing a supersonic transport (SST), the Tu-144. Any information concerning a production facility for the aircraft or first flight date for the Soviet SST is of considerable value. (S)

6. The Soviets have announced a new transport, the Tu-154. Any information regarding its testing and a production facility for the aircraft would be of value. (S)

7. Delete the rest of Section D of the last USSR CIRL, 1 May-31 August 1967.
